**Subject:** Observations of Chickens and Our Jigsaw Puzzle Is Complete

In these times of uncertainty, I have noticed more people are getting chickens in my neighborhood than before. I think it is a longing for some sort of security.

I now listen to a distant rooster in the morning. Years ago, there was a rooster next door and that rooster thought that morning was 3 o'clock AM. I didn't not sleep well then.

Today I learned something I didn't know about chickens. They have better balance than I thought. I saw a chicken hop onto the lower rail of a fence and stand there for a while. I thought it would topple over but when it wanted to get down, it just hopped off.

I'm sure BobbieJo could tell us lots of interesting fun facts about chickens!

As promised, here is a picture of our completed 300-piece jigsaw puzzle. We are graduating to a 500-piece puzzle this weekend!

Here is the third sign from Meadowbrook Orchards:

Stay safe and enjoy the nice weekend. The weather is supposed to be beautiful.

Janet
